MAJESTIC TONES

How to install presets in Lightroom Mobile

MAJESTIC TONES

1. Download the presets after your purchase.
   You'll get a .zip file on your smartphone.
   You don't have to anything with it (unless you want to move it to a special place, it's up to you).

2. Open the Lightroom app and click on one of your photo.

3. Click on Preset at the bottom of the screen (A)
   And then on the menu button (B)

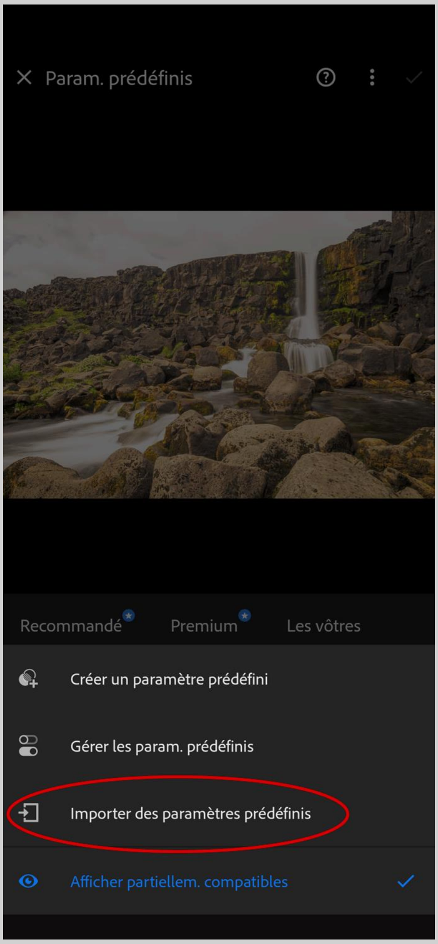
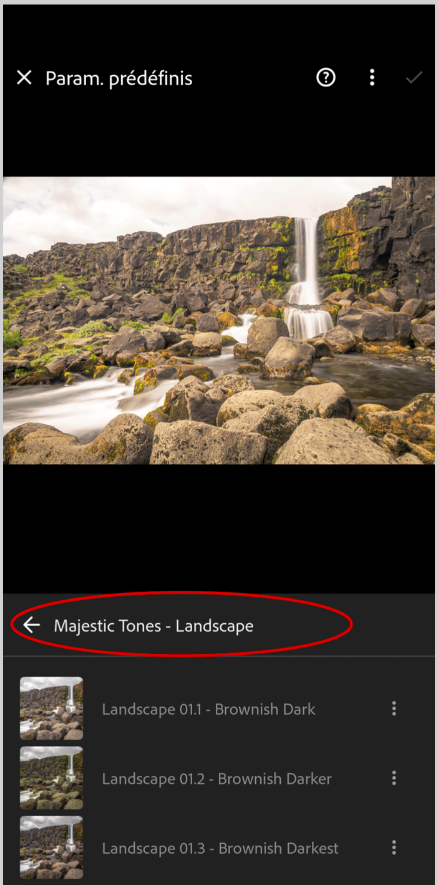
4. Click on « Import Presets »



5. On the new window, select the *presetfile.zip* you've already downloaded. It creates a new folder in the app.



Enjoy !
